GPT-6 Astra on robot arms

From: Hacker News

Source: Hacker News

The Brief

****What shipped****

GPT-6 Astra on robot arms has been shipped by an unspecified AI lab.

****Capabilities****

GPT-6 Astra reportedly boasts enhanced multimodal capabilities, allowing for improved interaction with both text and visual inputs. The model is said to support a context length of 32,768 tokens, although benchmark performance figures are not specified.

****Availability****

The availability details are not stated, including how to access the model or any potential pricing.

****Why it matters****

This development could unlock new applications for robotics that require advanced language understanding and generation, potentially enabling more intuitive human-robot interactions.

****Caveats****

The announcement lacks specific performance benchmarks and details on accessibility, making it difficult to assess its practical implications fully.
